

# Alloy Hollow Tine with Carbide Tip - .750MT x 4.750L x .425OD R201508

## Details

Carbide-Tipped Alloy Hollow Tine construction uses the same special high carbon alloy steel tubing and hardened to RC45-48 as the alloy hollow tines, with the addition of a carbide tip for even longer life. The advantage of using carbide-tipped tines is the ability to maintain your maximum aerating depth consistently over the life of the tines. You can expect these tines to last 6-8 times longer than the R&R Standard Hollow Tines. Carbide-tipped tines are not recommended in rocky soil conditions, as carbide, which is extremely wear resistant, can break when encountering hard impacts in rocks.

## Replaces

|              |           |
|--------------|-----------|
| R&R Products | R108-9139 |
| Toro         | 108-9139  |

## Specifications

|                                  |                               |
|----------------------------------|-------------------------------|
| Manufacturer                     | R&R Products                  |
| A - Tine Type                    | Alloy Hollow with Carbide Tip |
| B - Tine Mounting Dia.           | .750 in (19mm)                |
| C - Tine Length                  | 4.75 in (121mm)               |
| Carbide Tip                      | Carbide Tip                   |
| D - Tine Tip Outside (Hole) Dia. | .425 in (10.7mm)              |
| E - Tine Tip Inside (Core) Dia.  | .275 in (7mm)                 |
| F - Tine Wall Thickness          | .072 in (1.8mm)               |
